3 Could be better, but we're just using this regression neural network as practice for when we make an invertible regression neural network. There seems to be a small habit of underestimating the actual values.

3.1 The regression neural network looks like it does a pretty good job of predicting the max proton energy values, now can we get it to predict all three values at once?

[332]: *#Define a new neural network that outputs three features rather than one*

```
class MultiRegressor(nn.Module):
    '''
        Multilayer Perceptron for regression.
    '''
    def __init__(self):
        super().__init__()
        self.norm0 = nn.BatchNorm1d(4)
        self.linear1 = nn.Linear(in_features=4, out_features=64)
        self.norm1 = nn.BatchNorm1d(64)
        self.act1 = nn.LeakyReLU()
        self.dropout = nn.Dropout()
        self.linear2 = nn.Linear(in_features=64, out_features=16)
        self.norm2 = nn.BatchNorm1d(16)
```

```

        #self.dropout = nn.Dropout()
        self.act2 = nn.LeakyReLU()
        self.linear3 = nn.Linear(in_features=16, out_features=8)
        self.act3 = nn.LeakyReLU()
        #self.dropout = nn.Dropout()
        self.output = nn.Linear(in_features=8, out_features = 3)

def forward(self, x):
    '''
        Forward pass
    '''
    x = self.norm0(x)
    x = self.linear1(x)
    x = self.norm1(x)
    x = self.act1(x)
    #x = self.dropout(x)
    x = self.linear2(x)
    x = self.norm2(x)
    #x = self.dropout(x)
    x = self.act2(x)
    x = self.linear3(x)
    x = self.act3(x)
    #x = self.dropout(x)
    x = self.output(x)

    return x

```

3.2 The following two cells were used by me to figure out some stuff about the shape of our outputs

```

[333]: targets = data[:, 4:7]

        #print(targets)

        targets = data[:, 4]
        print(targets.shape[0])

        targets = data[:, 4:7]
        print(targets.shape[0])

```

80

80

```
[334]: targets = data[:, 4:7]
targets = targets.reshape((targets.shape[0], 3))
print(targets)
```

```

## 6 Conclusion:

- Apply the log function to intensity for neural networks and all of the outputs for the energies
- Maybe look into whether or not we only need to apply a log to the average energy?

```
[ ]:
```
